## THE PAINT FOUNDATION

501c3

“ An opportunity to donate the excess materials, machinery, equipment, vehicles, and funds to a better cause and avail tax benefits with our 501c3 Foundation. ”

## About us

Lets team up for a Better Cause.

After spending over 5 decades in the paint industry, manufacturing paints, paint raw materials and reusing items of varied specifications into batches of imperfections, we are so glad to have made mistakes. Creating items of a specification that meet the requirements of the markets at pricings that make painting surfaces possible in all communities.

Mr. Huzaifa's work on 13 Recycled product Patents in process with USPTO (United States Patent and Trademark Office) is absolute revolutionary contribution to the global industry. By inventing formulations, creating products and pioneering complex projects to simplicity, Mr. Huzaifa provides unlimited solutions, emerging as a Pathfinder.

## Mission

To Provide Environmentally sustainable reuse options to generators for their non-salable, non-useable, and waste.  
To Recycle it back in a circular economy, creating products of use and value for developing communities.

THE PAINT FOUNDATION

501c3

## Program

We are endeavoring to collaborate with Paint and paint raw material Industries to the common goal of Circular Economics.

Under a wider spectrum of remanufactured items, we have invented several products that are of quality and value. With different streams of sources ranging from Solvent-based and water-based inventories and consumables, we are successful in creating products.

It is now, in the era of abundance, the environmental equilibrium can be put in a sync with correct chemistries for social benefits. Reducing exploitation of resources in extractions of raw materials on the production side and reducing the damage to the environment by dumping back complex chemicals in the form of unused items back into the ecosystem on the disposal side.

## Purpose

THE PAINT FOUNDATION is designed to get solutions to both of the above issues. In the process of creating donations, affordable paint products, create employment and financial advantages to all the communities.

## Sustainability

We are a US-based local Charity Foundation that works on bringing Maximum Sustainability with the Paint and Paint Raw Materials manufacturing Industry. We work as a solution provider for generators of impracticable and unsalable. We create products using simple and complex chemistries to achieve final usable items from the unusable.

Based on the idea of reduction of waste creation by re-utilization of the excess inventories, expired/reject batches, by-products, change of markets, change of brands, extra inventories created during Mergers/acquisitions, items that could be transformed from waste back into the production line.

# THE PAINT FOUNDATION

Join us

“ Partner with us to Benefit the needy ”

[There are no entry fees to join The Paint Foundation.](#)

Everybody with access to background, knowledge, contacts, ability, and desire to serve the community are welcome. Participation in projects of collections of items and funding to accomplish circular solutions. We have prospects of free volunteer enrollments and employment generation in this unique process. Shops and Factories will have opportunities to better their financial and social standing using The Paint Foundation platform.

To create a team of Environmentalist to achieve a common goal of 100% sustainability and reuse. Have a zero-waste community. Uplift the communities providing paints and other utilities as Charity.

We open a platform for Paint industry professionals to join the forum and get associated with the social cause of their expertise. Participation with time, knowledge, expertise, guidance and the experience is equally valuable.

## Team Building

**Interns:** Building a team and welcoming new with ideas and energy directing the students into mainstream business. Students can practically participate in programs to develop awareness and solutions within communities. Creating value for and generating revenue.

**Volunteers:** Paint Professionals and related personnel interested in developing careers in the Recycling industry can contribute their time and connections to develop and spread solutions.

**Paint Stores:** Paint stores participate as collection points with the communities creating 100% paint circular economy neighborhood.

**EHS Professionals and Advisory Board:** EHS and safety persons can contribute ideas to the platform of creating a more sustainable society. The Board also consists of Executive personnel from the industry with inputs and ideas to better the Foundation and guide the direction for expansions.

**Paint and Paint related Industries:** We have a unique opportunity for paint and paint-related industries to be huge contributing partners by donating paints, paint-related items, and funds to operate and enhance productivity.

## Collections Programs

The donation is accepted in forms of Cheque/cash/transfer and in forms of materials/inventory/goods. But not limited to these, we are in a process of expanding the operations by all kinds of diverse possibilities, by accepting the below items in use.

1. Plants
2. Machines
3. Vehicles
4. Equipment
5. Intellectual Properties  
(Trademarks, copyrights, and patents).

Our programs of recycling with paint and paint raw material industries cover issues with:

- Off specs
- Customer returns
- Brand changes
- Industrial waste
- Solvent waste
- Washed waters
- Tank wash
- Machine wash
- Incomplete batches
- Batch Failures
- Gel Materials
- Alkyd wash
- Pigments and additive industry items
- Latex binders
- Hi-acid value/color variations
- Sweep Materials
- Mistints
- Expired inventory
- Takeover or Merger inventory issues
- Closeouts
- & all types of non-saleable, non-usable

**THE PAINT FOUNDATION**

We have Patents with USPTO in processes for 13 items creating revolutionary technology on recreating recycled products from the paint industry.

Several Articles have been published in various well known publications such as SCAA, IPCM, JCT, PCI, Paint India magazines.

We are active members with international ACA (USA), CPCA (Canada), SCAA (Australia), PRA (UK), IPCA & ISPA (India), SWANA (USA), SSPC (USA), ANAFPYT (Mexico) and few other paint Associations.

Honorary Speaker at conferences with revolutionary papers of Sustainability and Environmental advocacy of circular economies. (Previous and future selected).

1. Biobased US Conference Nov 2019 in Dallas,
2. Biobased Asia Conference Jan 2020 in Thailand,
3. Biobased European Conference Nov 2020 Netherlands,
